Firm Profile

Under the leadership of founding partners John Longman, Stephen Lindsey and Patricia Scanlon, and partners Ken Shook and Marc Hochlerin, our growing firm of engineers is one of the largest and most prominent acoustical consulting groups in the United States.

The partners of Longman Lindsey have worked with each other for several decades and have a combined experience of more than 100 years. Each partner has a broad portfolio of project types, providing acoustical design for corporate, education, (both K-12 and colleges/universities) retail, hospitality, entertainment, healthcare, residential, and cultural spaces, as well as museums, libraries, studios, and environmental noise control. Longman Lindsey takes pride in offering concise, cost-effective recommendations to every acoustical design. Decades of successful projects— from complex, iconic buildings to unique troubleshooting endeavors—are a testimony to our experience, which is without equal.

Located in New York City, our staff of experienced consultants works with clients in the metropolitan area, throughout the United States, and abroad.

Longman Lindsey: First in Experience.
