

Stephen Lindsey

Founding Partner

Stephen Lindsey is a founding partner at Longman Lindsey and is a leading practitioner in the field of acoustical engineering. With over 30 years of experience as a consultant to the construction industry, Stephen's extensive practical knowledge has brought practical solutions to a vast array of projects. He has used his specialized skills developing and implementing standards and design solutions for prominent developers, commercial and residential buildings, hospitality, network broadcast studios, and museums.

With absolute integrity, Stephen is an innovator, problem solver, and consensus builder. He is a demonstrated technical leader who has marked accomplishment in the professional and technical research, practice, and administration in the field of acoustical engineering. He manages a wide variety of acoustical architectural and mechanical projects across the country and abroad.
