

David Arena

Associate

David Arena is a project engineer at Longman Lindsey. He specializes in high-end residential construction and corporate fit-outs. David works meticulously to meet the needs of detail oriented clients. David is experienced in troubleshooting and providing pragmatic solutions to noise and vibration issues.

David was chosen by the Institute of Noise Control Engineers as a recipient of the Leo Beranek Student Medal for Excellence in the Study of Noise Control Engineering. David's research on the effect of acoustics on the interior environment has already been brought to his project work, as he assesses solutions for residential projects, educational and healthcare facilities, as well as exterior noise sources.
