

Matthew H. Rosenthal

Senior Associate

Matthew Rosenthal is a senior associate at Longman Lindsey and an acoustical engineer with nearly a decade of experience. He has worked on a range of facilities including entertainment and performing arts venues, academic learning environments, libraries, houses of worship, mixed-use facilities, resorts, residential, commercial offices, and museums. By concentrating on understanding the client's needs, he is able to develop solutions that are constructible, practical, cost appropriate, and respect the architecture of each of his projects.

After earning a dual Bachelor's degree from New York University, Matthew received a Master's degree in Music Performance at Yale University. He was also awarded the prestigious Stephen and Denise Adams Family Foundation Scholarship from the Yale School of Music. His love for music and passion for science are evident in his project work.
